## About Program

The Malaysian Society for Quality in Health Service Standard 3 requires hospital management to have staff who are competent to perform the function of healthcare facility manager. This Certified Healthcare Facility Management Programme is designed to provide the necessary knowledge and skill set required of a person to perform the task of facility management in a competent manner. The program meets the guideline set by MSQH as mentioned in the Service Standard 3 document.

## Objective

- Produce Facility Managers who can successfully manage and coordinate their physical workplace with the stakeholders;
- Facility Managers who are responsive to the needs of healthcare facilities and management, its functions and organisational objectives;
- Develop skills in key competency areas of facility management.
